Research Use Only Policy

Effective date: October 23, 2026

This Research Use Only Policy ("RUO Policy") applies to every product sold by Lyolab LLC ("LyoLab"). It is part of, and incorporated into, the Terms of Use and the Terms and Conditions of Sale. By applying for an account, accessing the ordering platform or purchasing any product, you agree to this RUO Policy on your own behalf and on behalf of the institution you represent. Capitalized terms not defined here have the meanings in the Terms of Use.

1 What "Research Use Only" means

1.1 All LyoLab products are Research Use Only ("RUO") products. They are supplied solely for in vitro laboratory research, pharmaceutical research and development, and analytical method development ("Research Use").

1.2 RUO products are not drugs, biologics, dietary supplements, foods, cosmetics or medical devices. They have not been evaluated, approved or cleared by the U.S. Food and Drug Administration or any other regulator for any use. They are not manufactured under current Good Manufacturing Practice for drugs and are not represented as sterile, pyrogen-free or suitable for administration to any living organism.

1.3 Every product is labeled: "For Research Use Only. Not for in vivo, diagnostic or therapeutic use." No other description, by any person, changes that status.

2 FDA statement

The statements made on this website have not been evaluated by the U.S. Food and Drug Administration. LyoLab products are not intended to diagnose, treat, cure, mitigate or prevent any disease. Lyolab LLC is a chemical supplier. Lyolab LLC is not a compounding pharmacy or chemical compounding facility as defined under Section 503A of the Federal Food, Drug, and Cosmetic Act, and is not an outsourcing facility as defined under Section 503B of the Federal Food, Drug, and Cosmetic Act.

3 Sold only to researchers who will research them

3.1 LyoLab sells only to approved research institutions, acting through Qualified Researchers: scientists, laboratory professionals and technicians who are employed by or under contract to the institution, are trained to handle research chemicals safely, and will personally conduct or directly supervise the research.

3.2 Each product must be received, used, stored and accounted for by Qualified Researchers at the institution's approved laboratory. Products may not be purchased for, or delivered to, anyone who will not personally conduct the research.

3.3 Eligible institutions are universities and academic laboratories, government laboratories, contract research organizations, biotechnology and pharmaceutical research and development organizations,

and analytical or testing laboratories.

3.4 LyoLab does not sell to individuals or consumers, pharmacies, compounding pharmacies, outsourcing facilities, hospitals or clinics (other than their non-clinical research laboratories), medical spas, physicians' practices, wellness, anti-aging or weight-loss businesses, gyms or fitness businesses, dietary supplement, food, beverage or cosmetic businesses, resellers, distributors or marketplaces.

4 Prohibited uses

No LyoLab product may be:

- used in vivo, or introduced into or onto any living organism by any route;
- used in or as a drug, compounded preparation, dietary supplement, food, beverage, cosmetic or veterinary product, or as an ingredient in any of them;
- used for any diagnostic, therapeutic, clinical or preventive purpose, or to affect the structure or function of any living body;
- resold, repackaged, relabeled, divided, distributed or transferred to any person or entity without LyoLab's prior written consent;
- marketed, reviewed, promoted or described by any purchaser with any health, therapeutic, wellness, performance or dosing claim, or in connection with LyoLab's name;
- exported or shipped outside the approved laboratory without LyoLab's prior written consent; or
- used in violation of any federal, state, local or foreign law, regulation or institutional policy.

Misuse of RUO products may violate federal and state law, including the Federal Food, Drug, and Cosmetic Act, and may result in civil and criminal liability for the persons involved.

5 Purchaser certification with every order

Every order placed through the platform is the institution's certification that:

- the products will be used only for Research Use, by Qualified Researchers, at the approved laboratory;
- no product will be put to a Prohibited Use, or resold or transferred;
- the information on the account is current and accurate; and
- the institution will keep records of receipt, use, inventory and disposal for each lot for at least three (3) years and provide them to LyoLab on request.

6 What LyoLab does not provide

LyoLab does not provide, and its personnel will not answer questions about, dosing, administration, reconstitution for administration, biological effects or any human or veterinary use. LyoLab does not sell or recommend syringes, bacteriostatic water or other administration supplies. Requests of that kind are treated as a sign of possible misuse and may lead to account review or closure. Product information is limited to chemical identity, purity, storage and handling, as shown on each lot's certificate of analysis and safety data sheet.

7 Verification and monitoring

LyoLab verifies every account before approval and may re-verify at any time. We may request documents, contact the institution and its researchers, review order quantities and patterns, verify ship-to addresses, and screen against government restricted-party lists. We may limit quantities, refuse or cancel any order, or suspend or close any account, without liability, if we believe a product may be put to a Prohibited Use.

8 Consequences of a breach

If LyoLab believes this RUO Policy has been breached, it may, without notice or liability: close the account; cancel open orders; refuse future sales to the institution, its affiliates and its personnel; report the matter as described in Section 9; seek injunctive relief; and recover all damages, costs and attorneys' fees, as set out in the Terms of Use.

9 Reporting

LyoLab may report suspected misuse, diversion, false information or other unlawful activity to the FDA, law enforcement or other authorities, and may share account, order and shipping information with them. By purchasing, you consent to such disclosure.

10 Assumption of risk; no liability for misuse

The institution assumes all risk arising from the receipt, handling, storage, use and disposal of products after delivery. LyoLab has no liability of any kind, to the purchaser or any third party, for any injury, illness, death, loss or damage arising from a Prohibited Use. The institution will defend and indemnify LyoLab as set out in the Terms of Use and the Terms and Conditions of Sale for any claim arising from a Prohibited Use, resale or breach of this RUO Policy.

11 Changes and contact

LyoLab may update this RUO Policy at any time by posting a new version. The version in effect when an order is accepted governs that order. Questions about this policy may be sent to Lyolab LLC, Attn: Legal & Compliance, [address], [legal@ email].
